

PROJECT NAME: CIT360 BASIC APPLICATION

Test Script Name:	Cover All Bases - Basic Applicaion			
Purpose:	Ensure the application handles all exceptions and executes proper examples			
Prerequisites:	Internet access and MySQL server			
Name of Tester:		Date:		
		Time:		
Step	Description	Expected Results	Pass?	Defect/Comments
1	Run the program	The user should be immediately greeted by the program and asked whether they would like to start		
2	Try to get around the Y/N option	Only Y or N (capitalized or not) should allow further progression		
3	Choose N	Program should close		
4	Return and choose Y	The program should move onto the main menu		
5	Try to get around the given options	Only a given option (capitalized or not) should allow further progression		
6	Use each option while disconnected from the internet and MySQL server is down or inaccessible	Each result should work, and the HttpURLConnection and Hibernate should handle the exceptions		
7	Use HttpURLConnection and Hibernate while connected to the Internet and the MySQL server	The results should change to reflect proper execution		
8	Choose Q	The application should close
